

Yes! the Card Access System in this proposal has many features, including Reporting, Schedule Control and Easy Programming.

But when your system comes from Citadel Locksmiths, you get Much, Much More!

- **Lightning Protection Surge and Power Filtering**
 - Not just one of those cheap “surge strips.”
 - We use a full-featured UPS, same as for computer systems
- **Gate Bracing:** added braces to protect against gate sagging
- **Gate Stop:** prevents damage from opening “too far”
- **Hydraulic Gate Closer:** gently but firmly closes gate
 - Existing Spring Hinges “slam” gate, causing damage
- **Free remote testing of your site, to help prevent costly service calls**
- **Full Software Training**
 - Telephone Help Desk to resolve future software questions
- **High-Speed Wireless Internet available to the pool area**
- **Fan-cooled cabinets with outside air intake.**
 - Why? Overheated equipment degrades and fails
- **Board-meeting presentations available after hours...Free of Charge**
