

Park Place Garage Door Replacement Process and Information

The garage door replacement process is as follows:

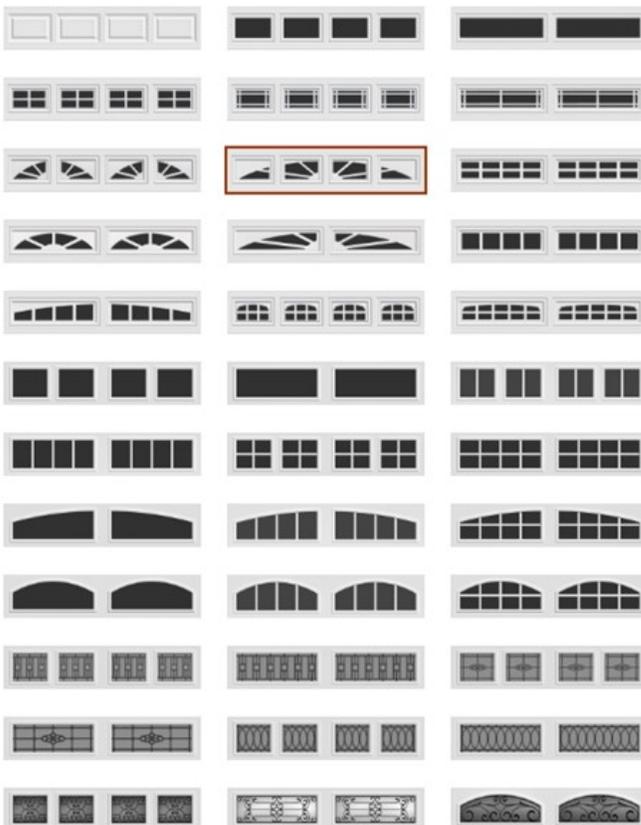

1. Notify Grandchester Meadows your garage door needs to be replaced.
2. Ask garage door companies for the type of window configuration that matches our community doors. Clopay is a national garage door vendor to which local companies have access. Home Depot has the same doors if you elect to choose a big box hardware store to help with replacement.
3. Provide drawings and/or specifications to the Architectural Review Committee in care of Grandchester Meadows.
4. Wait for approval before ordering or replacing the garage door. These requests are priority. As such, same-day approval is the goal.
5. Please see image for additional information.
